

Introducing Jigsaw Search's Live Salary Information Console

Jigsaw Search's online salary survey is the only 'real time' and 'online' salary data source for the Procurement and Supply Chain profession in Australia.

The candidate data is drawn directly from Jigsaw Search's database, the most comprehensive data source of its type in the country. Meticulously maintained and updated every minute of the working week, the data contained within it is live and as up to date as possible, constantly changing as our candidate's roles and pay structures change in line with market conditions.

Unlike the traditional paper based, benchmarked reports that are instantly out of date and far too vague, the results are uniquely live, tangible and truly reflect the market as it stands today.

How does it work?

The online salary survey allows you to view the average, current and wanted salaries of the thousands of candidates registered with us. You can search by job description, state and/or industry allowing you to create multiple scenarios such as the average, current and wanted salaries of procurement analysts working in the Finance industry in NSW.

Salary Survey Search Process (Example)

1. First select a Skill Category in this case Analyst

The screenshot displays the Jigsaw Search website interface. At the top right, there is a 'Candidate Login' section with fields for 'Username' and a password field. Below this is a navigation menu with links for 'Home', 'About Us', 'Case Studies', 'Market Reports', and 'Contact'. A 'Logout' link is also visible. The main content area features a search form with the following filters: 'Skill Category' (set to 'Analyst'), 'Skills' (set to 'All'), 'Industry' (set to 'All'), and 'State' (set to 'All'). A 'Search' button is located below these filters. On the left side, there is a 'Job Search' section with a magnifying glass icon. It includes a 'Salary Range' section with 'From:' (0) and 'To:' (\$300,000+) dropdowns, 'Job Category' (All), 'Job Type' (All), and 'Location' (All, Brisbane, Darwin) dropdowns. A 'Search »' button is at the bottom of this section. The Jigsaw Search logo is visible in the top left corner.

- Then select a Skill (in this case Procurement Analyst), and then either select an Industry or State are keep 'All' as required, When you are happy with your selection click the Search button to display the results

Analyst	Business Analyst	SA	\$82,500	\$87,500
Analyst	Business Analyst	SING	\$100,000	\$100,000

What are the benefits to businesses?

- Being live and mirroring market activity our data enables companies to truly benchmark today's market as opposed to where the market was some months ago.
- Real time information allows departmental managers to make accurate and justifiable forecasts for staff budgets and project managers to factor in realistic resource costs for their delivery schedules.
- Having current market knowledge allows businesses to evaluate whether their current pay structures are in line with the rest of the market so that they can offer realistic salaries when trying to recruit and can protect themselves from losing staff to competitors due to their salary scales being under the current market rate.
- Live market information allows businesses to compile realistic budgets for expanding or downscaling procurement and supply chain functions.
- Role descriptions and naming conventions on our database constantly change as the labour market refreshes itself. As our system is updated these changes are instantly logged and adjusted enabling you to gain an instant view of the changing market dynamics.

For more information on the functionality or to obtain your own personal log on details please call Jigsaw Search on 1300 655 633 or e-mail info@jigsawsearch.com and one of our consultants will contact you.
